1. We have reviewed this paper as requested and could find only a few items to which we might take exception. Most of the paper paraphrases the earlier version submitted over [redacted] signature. Pages 8, 9, and 10 do contain some new items, however, and I would direct your attention particularly to paragraphs 18 and 19 concerning the PI effort and the current review of overall PI resources. Note also the Recommendations which are new, on page 10.

3. The statement in paragraph 20, page 9, concerning there being enough personnel for photo exploitation "for the near term future" was challenged previously. We feel this should be corrected to reflect T.O. studies from NPIC and IAD previously submitted to Langley.
